

Kindergarten

Cathedral School

Mrs. Heidi Carswell

Kindergarten is a fun and busy room at Cathedral School. Throughout the day we work on reading language arts, math, science, social studies, and religion. You can often catch our class singing and dancing our way through the day! Specialized classes include, computers, art, physical education, Spanish, library, and music. We are also blessed to be able to attend mass on Wednesday mornings.

A very important part of kindergarten is socializing. We do this through play. To help us learn how to interact with each other we study the fruits of the spirit. By practicing kindness, gentleness, joy, peace, love, goodness, faithfulness, and self-control we are on our way to having positive interactions in and out of school.

8th Grade & Kindergarten Buddies

One of the kids' favorite things to do in kindergarten is play with our 8th grade buddies. Each student is paired with an 8th grader. We do special projects with the buddies and attend mass with them. At the end of the year the kids get to put their handprints in the tunnel together. By the end of the year the kids become great friends!

Outside the classroom we explore our surroundings. One special way we do this is adopting a tree to observe each year. The students pick a tree in the church yard and as a class we observe the tree throughout the school year. This year the kids named the tree Leafy. Leafy is already making changes for us to observe.
